

Coordinates were extracted from each Automatic Traffic Survey from the location north (51.947345, -0.029410) and south of the Baldock Road roundabout (51.946076, -0.029136) from Appendix U of James Duffy's PoE appendices (CD17.10a).

A measurement has been taken from google maps that indicates a distance of approximately 57m from the roundabout give way. This would be 46m back from the original crossing stop line position (drawing 25158 046 P1) and 30m back from the alternative setback stop line position (drawing 23161 043 P2).
